

## Agromet Advisory Bulletin for the District, Kozhikode (Valid from 08.03.2025 to 12.03.2025)

(Issued jointly by Kerala Agricultural University Regional Agricultural Research Station Pilicode& India Meteorological Department)

Bulletin Number:Pilicode/Mpm-19/2025 Date: 07/03/2025

## A. Weather Summary of preceding four days

| Rainfall, mm | Max. temp., °C | Min. temp., °C | R. H., % | Wind speed, Km/h |
|--------------|----------------|----------------|----------|------------------|
| 0.3          | 35.0 - 36.0    | 27.1 - 27.6    | 70 - 87  | 00 - 04          |

## B.Weather forecast for next five days

| Parameters                | 08-03-2025 | 09-03-2025 | 10-03-2025 | 11-03-2025 | 12-03-2025 |
|---------------------------|------------|------------|------------|------------|------------|
| Average Rainfall, mm      | 0          | 0          | 0          | 0          | 0.1        |
| Max. Temp, °C             | 36         | 36         | 36         | 36         | 36         |
| Min. Temp,°C              | 27         | 27         | 27         | 27         | 27         |
| Max. Relative Humidity, % | 85         | 85         | 85         | 85         | 85         |
| Min. Relative Humidity, % | 75         | 75         | 75         | 75         | 75         |
| Wind speed,km/h           | 4          | 6          | 6          | 4          | 8          |
| Wind direction, degrees   | 270        | 270        | 290        | 290        | 270        |
| Total cloud cover, octa   | 6          | 3          | 3          | 3          | 7          |

## C. Agrometeorological Advisories

| Crop               | Stages  | Problems | Agro-meteorological advisories |  |  |
|--------------------|---|----------|--------------------------------|--|--|
|                    | No Rainfall **  |          |                                |  |  |
| General            | Temperatures will be higher during the day. Atmospheric humidity will be normal.<br>No rainfall from March 07 to 10.                          |          |                                |  |  |
| conditions         |   |          |                                |  |  |
|                    | There will be light rainfalls (From2.5 mm to 15.5 mm within a time span of 24 hours) on March   |          |                                |  |  |
|                    | 11.   |          |                                |  |  |
| Weather<br>warning | Maximum temperatures are very likely to be around $36^{\circ}$ C in Kozhikode district from March 7 to 9.                                     |          |                                |  |  |
| Impacts            | High rate of evaporation may occur from soil.   |          |                                |  |  |
|                    | Chances for attack of sucking pests.  |          |                                |  |  |
|                    | Direct exposure to sunlight may cause sunburn and injuries to human and animals.  |          |                                |  |  |
|                    | Provide shade net for vegetable crops and ensure irrigation.  |          |                                |  |  |
| General            | Mulch the crop basins.  |          |                                |  |  |
| Recommendat ions   | Irrigate the crop when the water is available in the evening or early morning. Adopt drip irrigation method for maximum water use efficiency. |          |                                |  |  |
| 10110              | 1. Arrange for irrigation facilities from available water resources.  |          |                                |  |  |
|                    | 2. Remove weeds from the soil to reduce transpiration losses. Powder the soil to dust by  |          |                                |  |  |

|               | <ul> <li>breaking the clods. This will act as good soil mulch to prevent evaporation loss of water.</li> <li>3. Well drained areas where lifesaving irrigation possible ragi and millets cause cultivated.</li> <li>4. Take care of controlling of sucking pests; control/minimize the insect and pest incidence with IPM.</li> <li>5. Repair and rejuvenate local water bodies before the rainy season.</li> </ul> |   |  |  |
|---------------|---|---|--|--|
| Coconut       | All stages  | Drought Management  | <ol> <li>Cut two green leaves from the<br/>bottom layer, to reduce the water loss<br/>from the tree.</li> <li>Apply compost/dried leaves in<br/>the basins to increase water holding<br/>capacity.</li> <li>Adopt drip irrigation. This<br/>will minimize the irrigation water loss.<br/>Protect the newly planted young<br/>seedlings from direct sunlight falling<br/>on it by providing good shades.</li> </ol> |  |
| Coconut       | Various stages  | Leaf eating caterpillar   | The season is congenial for the spread of<br>leaf eating caterpillars in coastal areas.<br>Cut and burn the affected leaves.<br>Release larval parasitoids, <i>Goniozus</i><br><i>nephantidis</i> , @10 nos/palm (4-6<br>release) on the trunk   |  |
| Various crops | Various stages  | Sucking pests<br>Sucking pests<br>Sucking pests<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Sucking<br>Suck | To control the pests apply neem oil<br>emulsion (5 ml. neem oil mixed in one<br>litre of luke warm soap water solution)<br>Or<br>Apply malathion 50 EC @ 2 ml + neem<br>oil 4ml per litre of water   |  |

| Arecanut                 | Bearing palms    | Inflorescence die back and<br>button shedding | Warm humid conditions may cause this disease. Spray Hexaconazole (Contaf) 1 ml/litre or Bordeaux mixture 1%. Repeat after 20-25 days.   |
|--------------------------|------------------|---|---|
| Cowpea                   | All stages       | Aphid   | Spay 3% Neemoil garlic emulsion or<br>Dimethoate @ 2 ml/L   |
| Poultry and pet<br>birds | Different stages | Summer stress                                 | To combat heat stress, the poultry sheds<br>should be protected from direct sunlight,<br>roofing can be painted white to reflect heat,<br>fans can be fitted, cool water can be sprayed,<br>plenty of clean water can be provided with<br>ice, glucose and 0.1 % sodium bicarbonate,<br>feed offered during the cooler parts of the<br>day can be supplemented with 20% extra<br>vitamins, phosphorous and vitamin C.                   |
| Animal<br>Husbandry      | All stages       | Summer Stress                                 | The rise in temperature will affect the<br>thermoregulatory mechanism of dairy<br>cattle. This will cause increase in body<br>temperature, rapid shallow breathing,<br>increased heart rate, profuse salivation,<br>and reduced feed intake. This in turn<br>results in severe production loss and<br>reduced breeding efficiency in dairy<br>cattle.<br>Provide pure drinking water to the<br>dairy cattle (45 to 60 litres of water), |
|                          |                  |   | Allow grazing only during the cooler<br>parts of the day. Provide shading.<br>Shelter them in thatched roofings of<br>minimum 9 ft. height with ample<br>ventilation. Providing fans, misting and<br>fogging assembly in cattle sheds will<br>help them to regulate body temperature.<br>Also ensure minerals fortified feeds.  |

\*\* Warning colour codes of rainfall (for disaster management)

| Warning (Take actions) | Alert (Be prepared) | Watch (Be updated) | No warning (No actions) |
|------------------------|---------------------|--------------------|-------------------------|
|                        |                     |                    |                         |
